ARIEL ALVARADO ARANA

- Mérida, Yucatán
- (+52) 99 92 97 19 85
- ariel32_124@hotmail.com

PROFILE

I hold a degree in Digital Design, which provided me with valuable design skills that have greatly supported my journey into front-end development. This background sparked my interest in web development, and I am now pursuing a second degree in Computer Systems while advancing on the path to becoming a full-stack programmer. I specialize in technologies like React and Python, among others. With over four years of experience as a developer, I have gained a wide range of skills in creating websites and web applications.

EDUCATION

Metropolitan Technological University
Associate Degree in Digital Design and Animation | 2021

EMPLOYMENT HISTORY

Front End Developer

AI Soul Lens Studios | March 2024 - Present

- I have worked on websites for various brands using trending technologies such as WordPress, React, React Native, and others.
- I have also proposed, designed, and developed applications using Next.js and TypeScript for the client side, and Django for the server side.
- Additionally, I collaborated with a small team of developers and designers to create apps for startups and SMEs.

EMPLOYMENT HISTORY

<u>Lead Game Artist</u>
Grim Panda LLC | February 2022 - March 2024
- I worked as the leader of a large international team in the creation of storyboards and interactive advertising for companies such as Rovio, Zynga, Ubisoft, among others.
- I played a key role in bridging the gap between design, development, and production departments.
- Collaborated with developers in creating HTML and JavaScript minigames for advertising campaigns.

<u>Full Stack JavaScript Developer Intern</u>
Pyxabyte | June 2023 - December 2023

Collaboration in the creation of a web-based study platform, including:
- Site layout for desktop and responsive design using Next.js and React.
- Endpoints development.
- Implementation of exception handling.
- Input data validation.
- Gestión de autorizaciones mediante Nest.js.
